

I would not have signed up originally to be on the "Do not call" list if I wanted to continue receiving those nuisance calls. I believe that suppliers should value my privacy at home with the same respect that I value theirs. I can not condone a group of my peers banding together to continually call any supplier at their home or at their place of business to bother/harrass them; which would be the equivalent of me receiving calls from a supplier that I have chosen to cease to do business with for reasons that are my own. Let them put up their signs, their billboards, run their TV and radio commercials, and newspaper advertisements; but allow me to have the privacy I deserve in my own home. DO NOT CHANGE THE STATUS OF THIS MATTER!
